

THE BENEFITS OF CHOOSING SHUTTERS FOR YOUR WINDOWS

PRIVACY AND SECURITY

Lowering the shutter louvers can provide privacy and a sense of security for your home. Shutters with 2 tiers can provide light from top with open louvers and a privacy and security from the bottom tier offering the best of both worlds.

LOW MAINTENANCE

When comparing traditional window coverings, Shutter Shield shutters offer very little maintenance. The Dust does not collect on shutters as they do on blinds and fabric curtains. The collection of dust left on blinds and curtains are a breeding ground for dust mites. Shutter Shield Shutters are a perfect choice for those that suffer from allergies.

UV PROTECTION AND FLEXIBLE LIGHT CONTROL

Shutter louvers have the ability to be angled and tilted to control how much light enters your home giving you a great view of the outside while keeping you privacy on the inside.

The control of light also keeps a limit to the harmful UV rays that destroy your furniture and floors. Shutter Shield utilizes a state of the art paint that covers your investment with a UV protective layer. This protects the paint and wood from any possible fading or warping.

SOUND AND THERMAL

Busy streets and outdoor activities can sometimes feel like it's all taking place in your home. Closed shutters offer an added layer of sound protection while insulating your home from keeping the warmth in during the winter season reducing your heating bills. In the summer we encourage you open your windows while keeping panels closed assists in keeping unwanted heat out allowing the air to circulate.

INVESTMENT AND CURB APPEAL

A plastic shutter will appear shiny from the road making them very evident of its plastic qualities and shine. Shutter Shield solid wood shutters give that high end original design feel making the view stunning inside out! Because shutters are permanent fixtures they could also increase the potential price of your property.
